

**BITBOT**

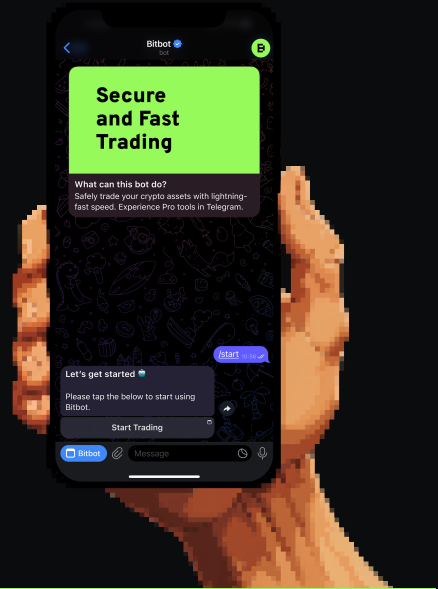

**WHITE  
PAPER**

**YOUR KEYS.  
YOUR WALLET.  
YOUR ASSETS.**

# Preface

---

Throughout the years, we've witnessed the exhilarating highs and lows of bull markets, each leaving its mark on the financial landscape.

In the glow of hindsight, a tantalizing 'what if' always echoes. "What if I had clung to my BTC? Or seized the chance with Shiba Inu when it was a mere \$10?"

Our vision is to reduce the world of 'what ifs' for retail traders.

**Enter Bitbot – the world's first non-custodial Telegram trading bot.**

In a world of hacks and leaks, Bitbot is the first Telegram bot that offers integration with self-custodial wallets, marrying ironclad security with advanced trading tools in a sleek, user-friendly package.

It's not just another trading bot; it's a game-changer. It's not just powerful – it's the epitome of automated trading. Our features allow you to outmaneuver even the most sophisticated institutional traders.

What we offer is a solution for those looking for the best in class telegram trading experience, but backed by serious security protocols.

**Take control of your keys.  
Trade smarter. Trade with Bitbot.**

“

The only thing I'm afraid of about this country is that its government will someday become so monstrous that the smallest person in it will be trampled underfoot, and then it wouldn't be worth living in.”

**- Harper Lee**

The GameStop saga inspired a new vision for financial technology. We believe that the true revolution in finance comes when the ordinary investor realizes their collective power. With Bitbot, we bring it to Crypto.

Bitbot is on a mission: to democratize the financial markets by providing institutional-grade tools in a safety-first non-custodial framework. We deliver the tools the pros use to grow their portfolios, in a security-conscious package.

# The inception of a new era of trading

Telegram boasts a massive user base of over 800 million. It is where social connections meet trading opportunities and has enormous untapped potential for traders across the globe. Bitbot harnesses this extensive network, equipping everyday traders with the toolset of a powerhouse. It empowers everyone to become the modern-day David in the David vs Goliath tale, challenging the Titans of finance.

“

There is a set of advantages that have to do with material resources, and there is a set that have to do with the absence of material resources

– and the reason underdogs win as often as they do is that the latter is sometimes every bit the equal of the former. ”

– Malcolm Gladwell, David and Goliath

# The BITBOT Approach

The challenges for retail investors include time, capital, and access to secure trading instruments. Not everyone has the capacity to invest \$100 million in a perpetual future using someone else's money. When it's your money on the line you want the best in class service.

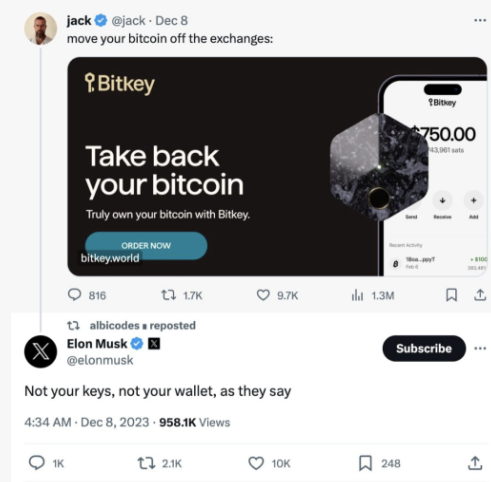

In today's Telegram trading bot market, the dilemma is clear: it comes down to selecting either utmost convenience or robust security.

We've merged the best of both - Bitbot delivers an elegant, non-custodial trading solution on Telegram. Powered by our institutional-grade tools, you can now rival those who once beat you. With our proprietary AI integration completing the package, you're left with just one thrilling choice: Which token will you buy?

Before we get into the nitty-gritty, let's begin with a crucial question: Are your assets truly yours?

Elon Musk obviously holds a distinct stance on this crucial issue. At Bitbot, our principle is simple:

**your keys, your wallet, your assets.**

# Under the hood

Our features are designed to deliver powerful automated trading, control via telegram but with a non-custodial solution so we deliver on our premise of “your keys, your wallet, your assets”.

**Our development focuses on:**

- 1 Security**
- 2 Data & Intelligence**
- 3 Advanced Trading**
- 4 Wallet Integration**
- 5 UX and UI**
- 6 Referral programme**

# \$BITBOT

## A Token with Purpose

The \$BITBOT token brings a new dimension to Bitbot's trading platform:

### Revenue Sharing

Our goal is to develop a revenue sharing model that rewards \$BITBOT holders with the platform's progressive growth.

### Exclusive Access

As \$BITBOT holders, enjoy first-hand access to pre-sales, as well as indulging in unique and electrifying perks and airdrops.

### Governance

Your \$BITBOT, your voice. Your \$BITBOT stake steers Bitbot's strategic path.

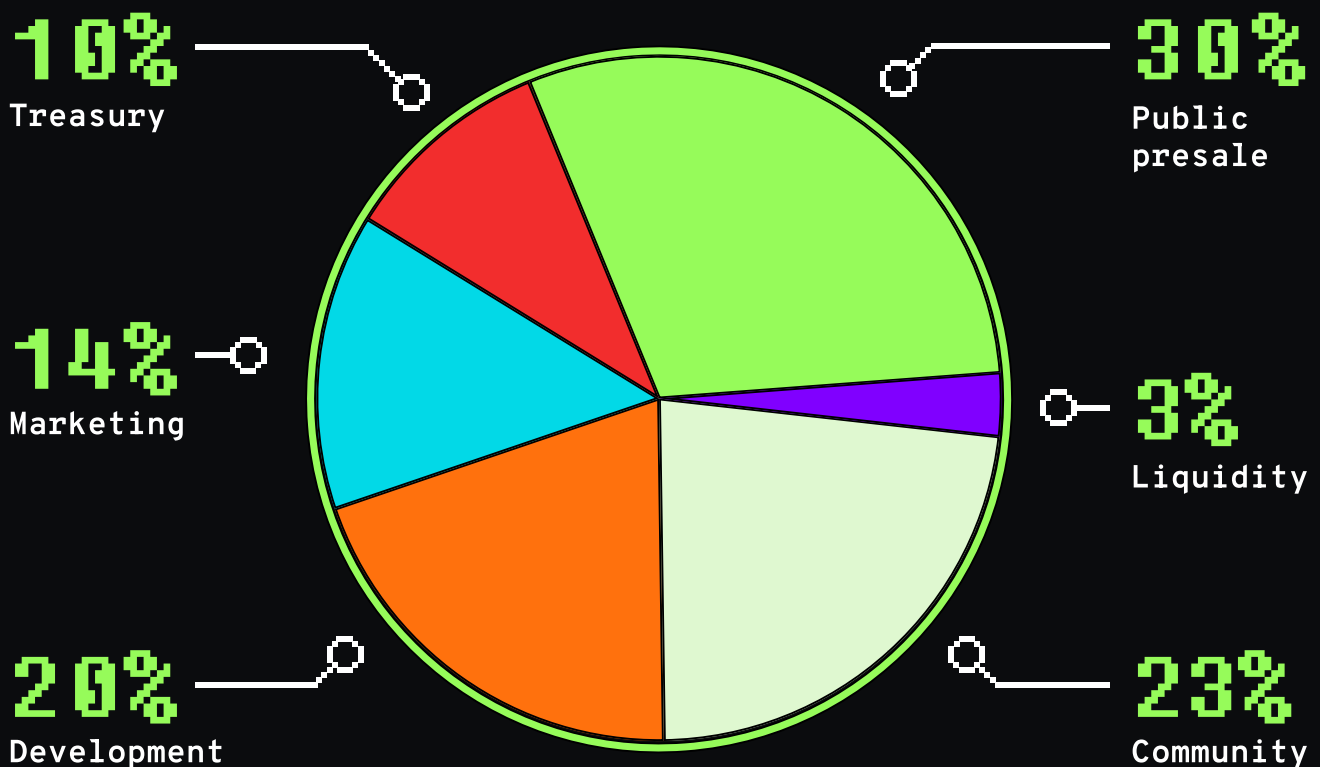

### Community

Mingle with an exclusive assembly of seasoned trading experts in our exclusive private chats.

# The Bit Fiscal: Tokenomics

Our goal is speed and we have two key goals: one to complete our presale raise as quickly as we can and two for us to deliver a public beta.

The total supply of tokens is capped at 1 billion (1,000,000,000). Here's how the allocation breaks down:

### **Public Presale: 30% (300,000,000 tokens)**

This allocation allows early adopters to participate in the growth of Bitbot from the ground up.

### **Liquidity: 3% (30,000,000 tokens)**

These tokens are dedicated to providing liquidity, ensuring smooth transactions within the ecosystem.

### **Community: 23% (230,000,000 tokens)**

A significant portion is reserved for the community. This reflects Bitbot's commitment to its users and the principle of being powered by the people.

### **Development: 20% (200,000,000 tokens)**

These tokens are set aside for ongoing development, with a 6-month cliff and a 24-month linear emission schedule. This ensures that the development team is incentivized to continuously improve and maintain the platform.

### **Marketing: 14% (140,000,000 tokens)**

Strategically earmarked for marketing, a key driver in enhancing Bitbot's reach, fostering user growth, and nurturing a vibrant community. This fund backs various initiatives, from digital marketing and community events to content creation and partnerships, all focused on propelling our project's trajectory and impact.

### **Treasury: 10% (100,000,000 tokens)**

Long-term sustainability and operational expenses of Bitbot.

---

### **Total: 100% (1,000,000,000 tokens)**

The total allocation ensures a balanced distribution, supporting various aspects of the Bitbot ecosystem.

# The Bitmap

## Bitbot's Odyssey: Revolutionizing Trading in 2024 and Beyond.

### Presale Launch

(Q1, 2024)

Kickstarting the year with the launch of our decentralized exchange, marking a cornerstone event for Bitbot.

### Bitbot Launch

(Q2, 2024)

The grand unveiling of Bitbot, bringing our advanced trading platform to a global audience.

### Strategic DEX Integration

(Q2, 2024)

Elevating Bitbot's presence through listings on key decentralized exchanges, enhancing market penetration.

### Selective CEX Exploration

(Q2, 2024)

Pursuing strategic listings on centralized exchanges, expanding our reach and influence.

### Era of Continuous Innovation

(Q3, 2024 & Beyond)
